

UC Master Gardeners of Santa Barbara County present:

## FREE MONTHLY ZOOM GARDEN TALK

Master Gardener Russ Baldocchi will share a research-based presentation providing important information on how to grow avocados, including: selecting a variety for your microclimate, planting, water needs, fertilizing, pruning and pests.

We live in avocado country! The best avocados can be grown in your garden, and they are a nutritious reward. Your next avocado tree will be productive and satisfying.

We hope you will join us to learn the best strategies for growing an avocado.
