

Santa Barbara County

Garden Talk

Drip Irrigation for the Home Garden

The UC Master Gardeners of Santa Barbara County invite you to join us online for our next Garden Talk, from 7:00-8:00PM on Monday, May 2, 2022.

UC Master Gardener Ken Falstrom will share a research-based presentation, "Drip Irrigation for the Garden". When done correctly, drip irrigation conserves water in home gardens and landscapes by delivering water directly to plants, at the rate they need. Ken will discuss the advantages and challenges of using drip irrigation, including installing and maintaining systems in both new and existing gardens.
